Short description:

Simple car cell phone holder

Description:

<p>Simple cell phone holder to insert in the CD tray of your car.</p><p>It is based on the original work from http://www.thingiverse.com/thing:644402, but redesigned in OpenSCAD to make it parametric so it can be used for any smart-phone.</p><p>The measures in the script and the STL are for my Google Nexus 4.</p><p>Don't print this in PLA, as it will bend when your car stays in the sun! ColorFabb XT or ABS will work fine.</p>

If you can, please use the online documentation found at http://www.youmagine.com/designs/parametric-cd-tray-mount-for-cell-phone because those may have been been updated. Also, there you can interact and provide praise and/or feedback.
